

Adapting to Better Serve Patients

During this uncertain time, recent guidelines released by CMS show that Telehealth appears to be the only viable solution to continue to providing Physician-Patient interactions that are billable in the event of a state or national shutdown. Telehealth has grown significantly in recent years with the rise of traditional healthcare costs and surge of digital health users.

In light of COVID-19, the burgeoning demand for Telehealth adoption is leading to exponential growth; however, for physician practices, there is an expanding list of challenges to cost-effectively and rapidly implement Telehealth in a HIPAA compliant manner. Telehealth technology alone isn't the solution; understanding the fabric of practice operations and patient experience, while layering in Telehealth with smart digital integration, is the pathway to strategic success.

Global telemedicine market size from 2015 to 2020 (in billion U.S. dollars)

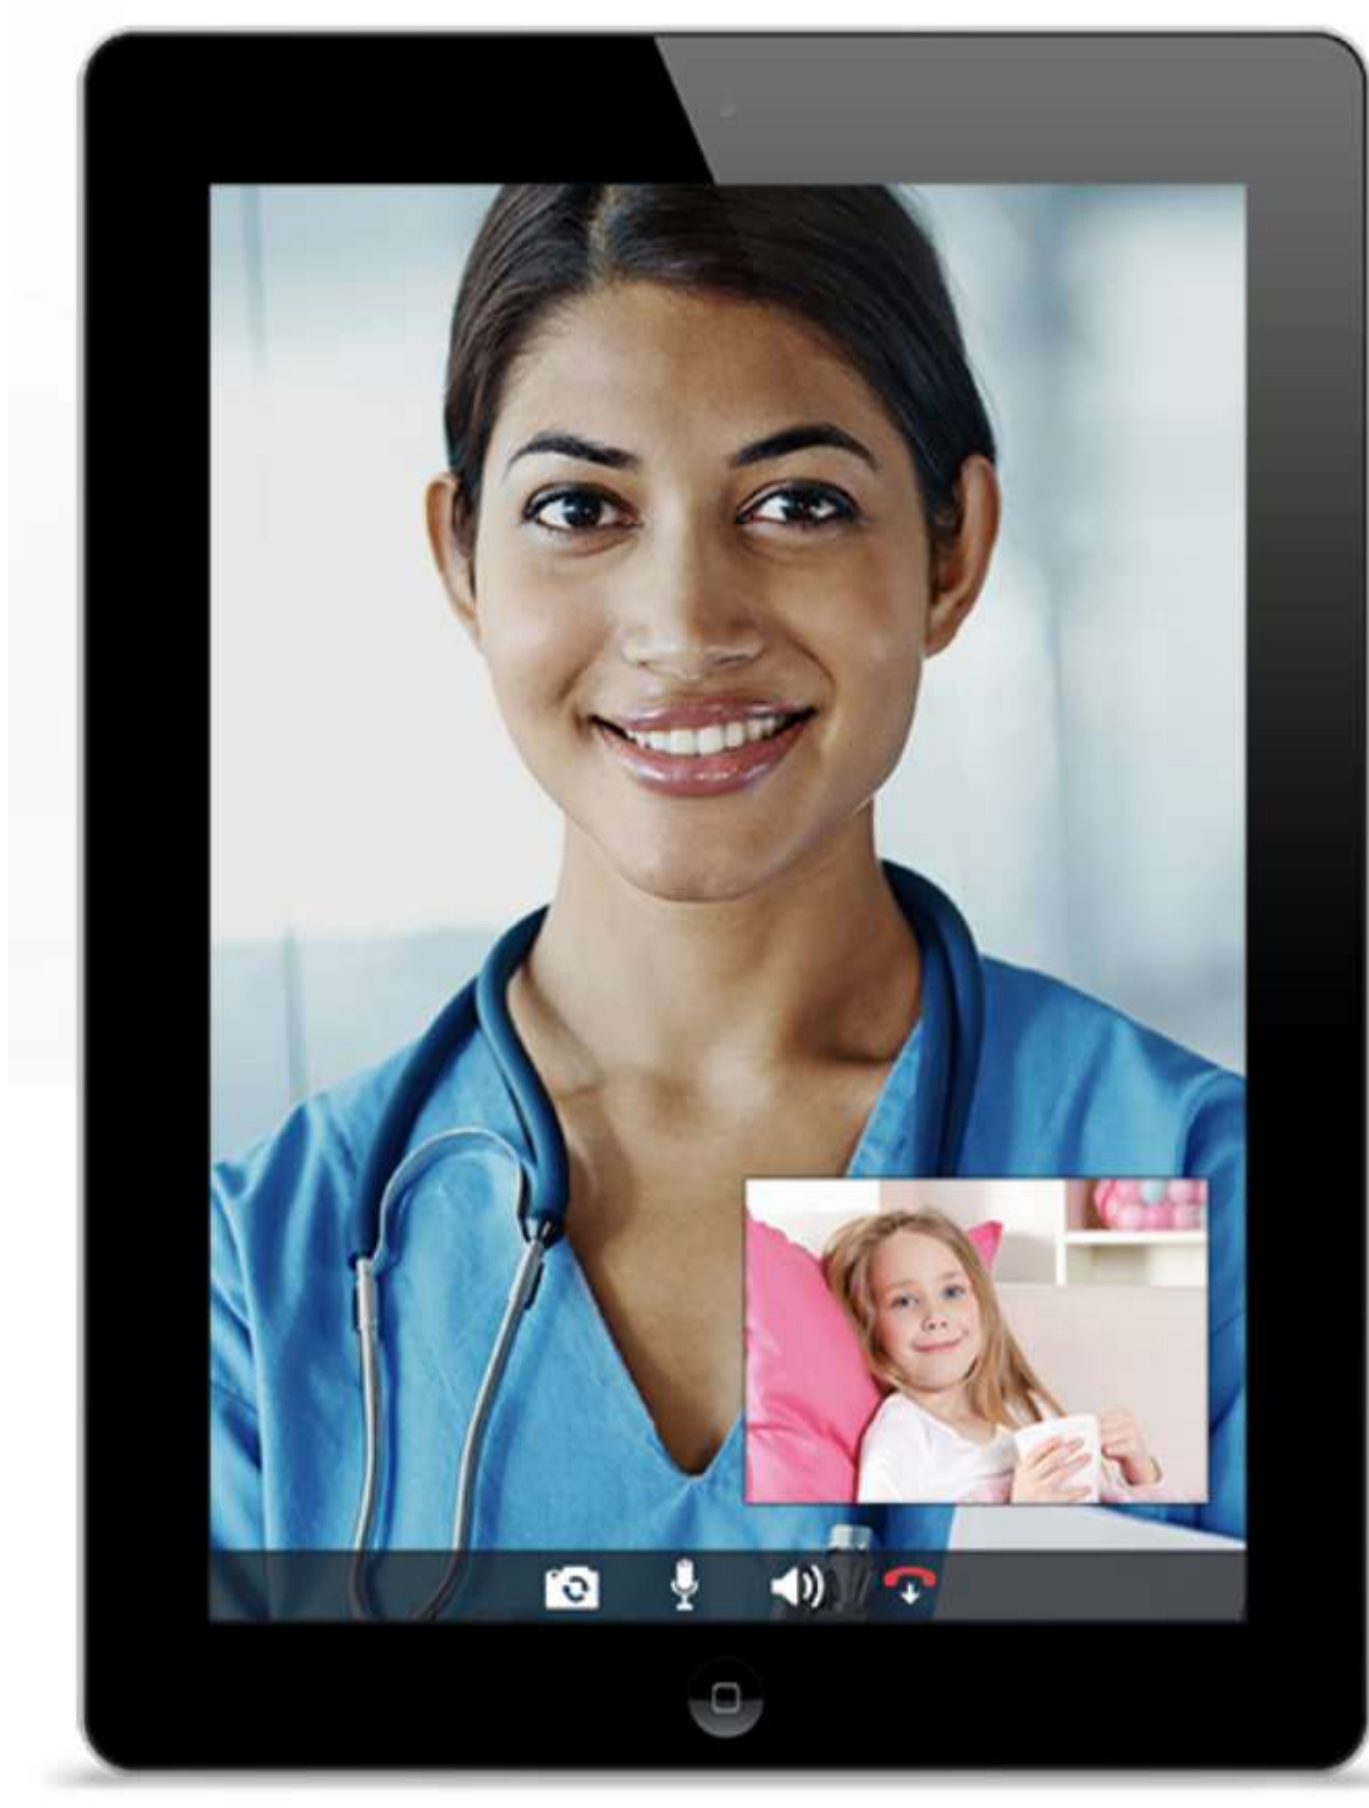

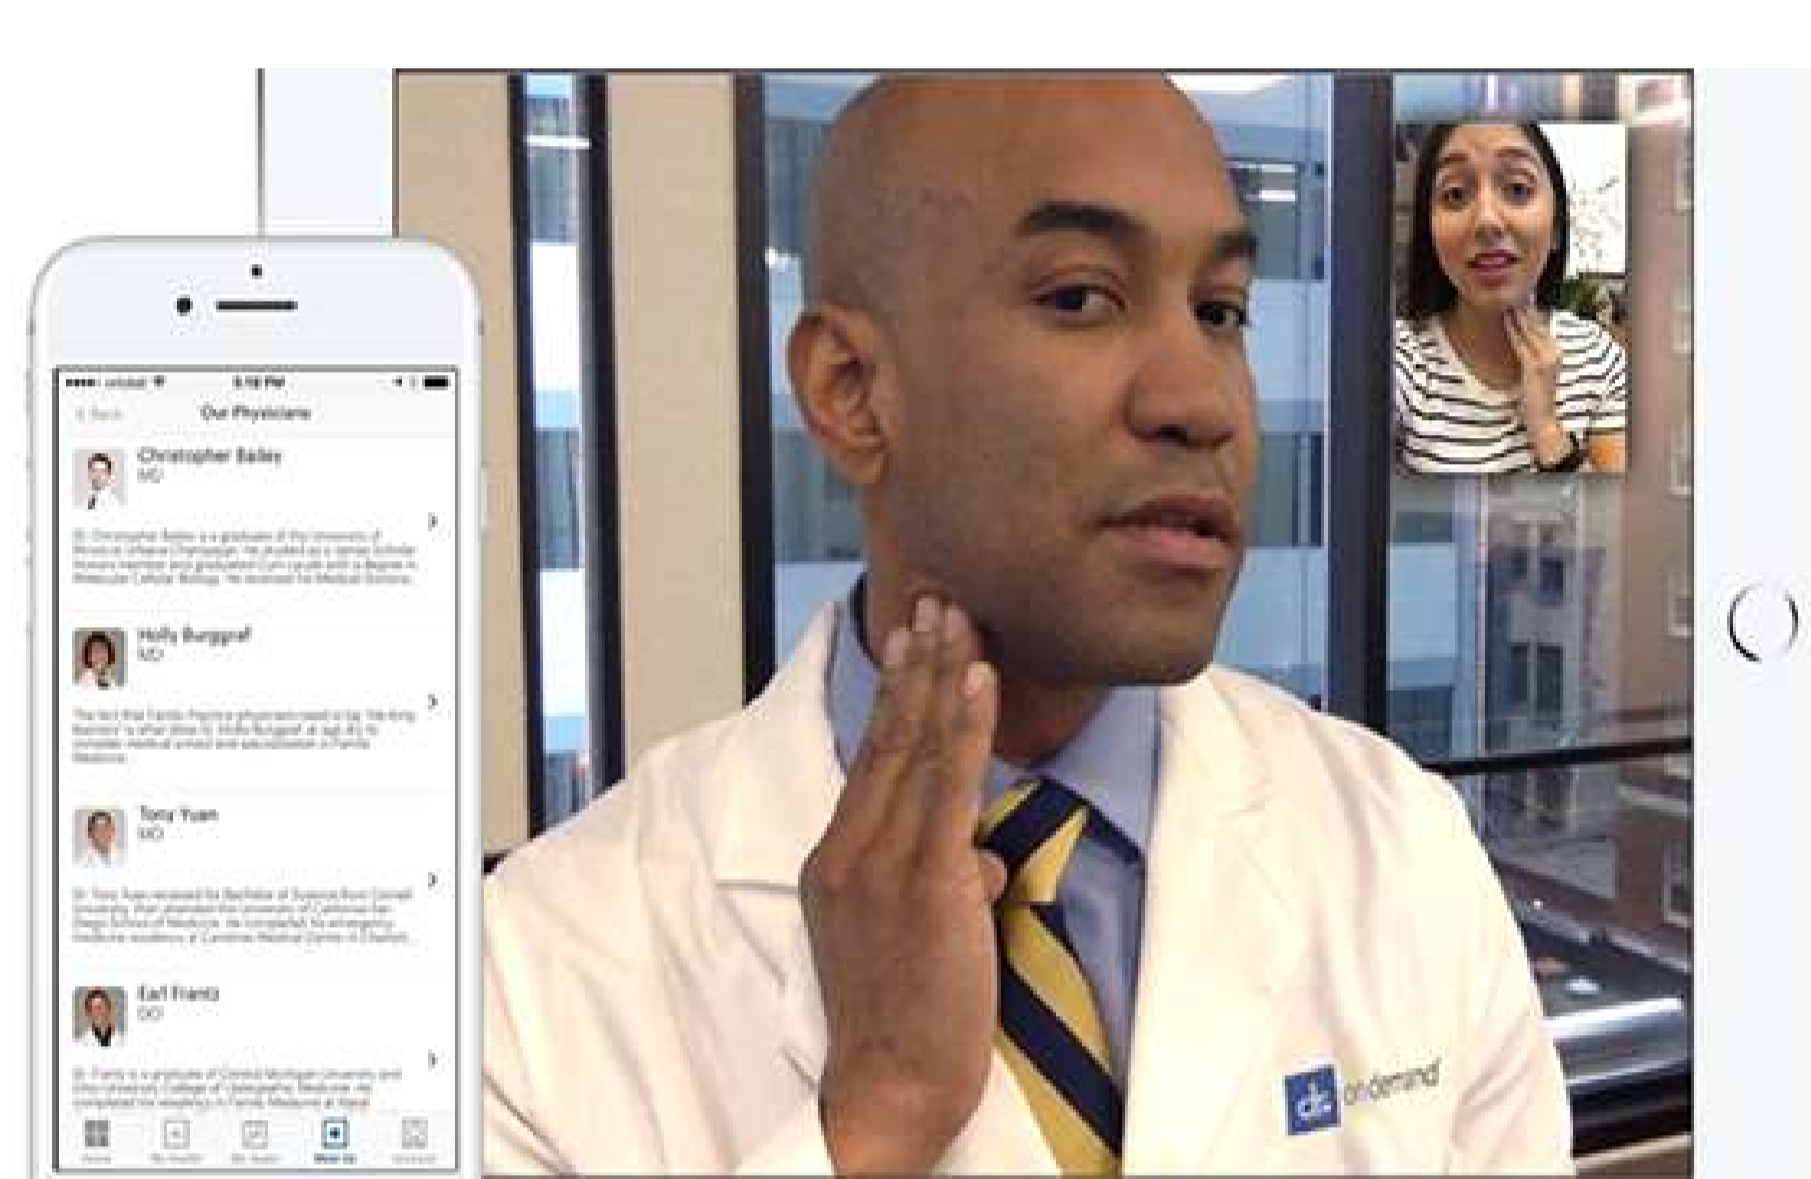

Valet Health Has Vetted Telehealth Vendors Across Criteria Such As...

✓ Telehealth Implementation Time & Tech Infrastructure	100%
✓ Length of Contract & Cost Per Provider Efficiency	100%
✓ HIPAA Compliance & Security Check	100%
✓ Onboarding, Documentation, & Ongoing Support	100%
✓ Website, Patient Comms, Digital Integration Support	100%

Connecting Patients to Quality Virtual Care

- ✓ **Opportunity & Solution:** Amidst these challenging times, Valet Health is offering a unique solution toolkit for physicians called **Telehealth Jumpstart**, to efficiently support a HIPAA compliant + rapid implementation of telehealth for providers.
- ✓ **Quality Care:** Patients can access clinicians and reliable health information while avoiding public transit and crowded environments during this time.
- ✓ **Upside:** Practices can establish Telehealth and evolve to continuously grow that level of connectivity with patients as they increasingly turn to digital and virtual communications.

What is Telehealth Jumpstart?

A turnkey support solution offered by Valet Health, partnered with Doxy.me, in three simple steps:

1. Register your practice for Telehealth patient care on Doxy.me where Valet Health handles your practice setup
2. Integrate Telehealth on your practice website (online appointment form requests & trackable inbound calls)
3. Get valet support with onboarding, video screencasts, website integration, digital communications to patients, and telehealth adoption of Doxy.me
